# Fully Automatic Packing Machine Model FC

**Self-adapting for textile rolls of different diameter and length**

**>>> The packing method of the future**

## **There are many reasons why to choose MAAG FC Packing Machine**

- tight and perfect wrapping
- high productivity due to full automation
- capable of wrapping rolls at a mixture of random sizes
- no heat shrinking required
- environmentally friendly
- very low energy consumption
- excellent spare parts supply service and technical support

## Operating method of the automatic packing machine model FC

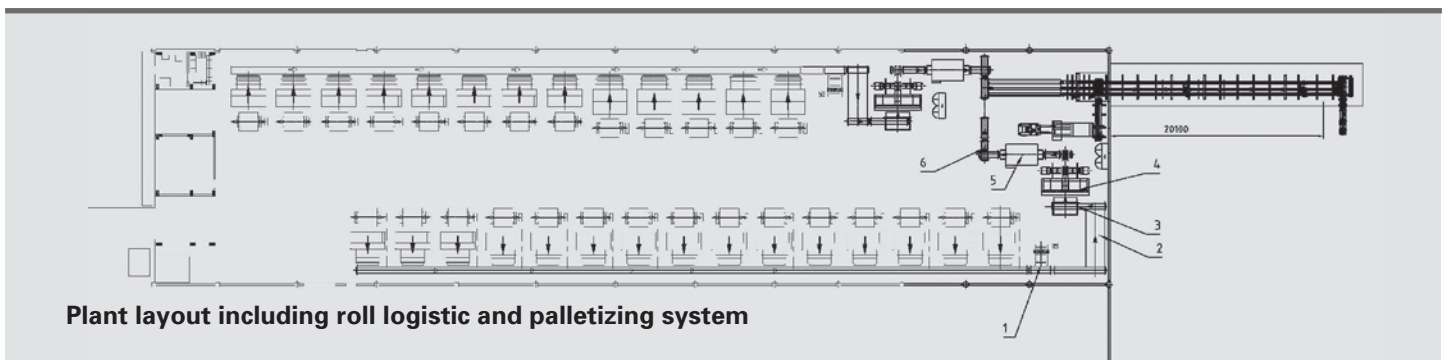

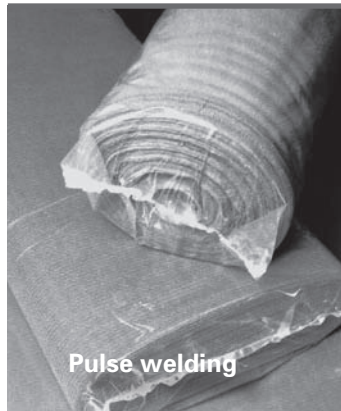

The machine monitors the size of each individual textile roll and will adjust itself fully automatically during the packaging process.

Therefore, mixed sizes of rolls can be packed without making adjustments to the machine, still producing perfectly tight packed rolls without heat shrinking.

The ends of the foil can either be closed with pulse or ultrasonic welding.

### Technical data

max. width of PE-foil:	4000 mm
max. roll ø:	1200 mm
Packing capacity:	3 - 4 rolls/min.
max. roll weight:	500 kg
